Enrollment Via Census - Export, Edit and Upload

1. From **Enrollment > Online** in the left navigation, click **Census** to view the **Group Census** page.

2. Next, choose Export Census (by date) or Download Template for a blank Census template.

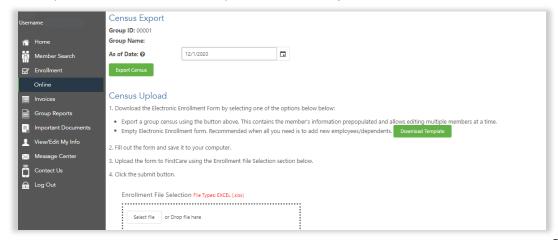

Review all tabs in the Census spreadsheet.
 <u>Instructions Tab</u>: Includes details on all required fields and formatting. To expedite processing, add a
 Contact Name, Phone Number, Email and Group Name to the form at the bottom of the Instructions tab.

Examples Tab: Provides examples of information required for Enrolling Family Coverage, Enrolling Single Coverage, Adding a Dependent, Terminating Coverage, Adding COBRA Coverage and Address Change via Census Upload.

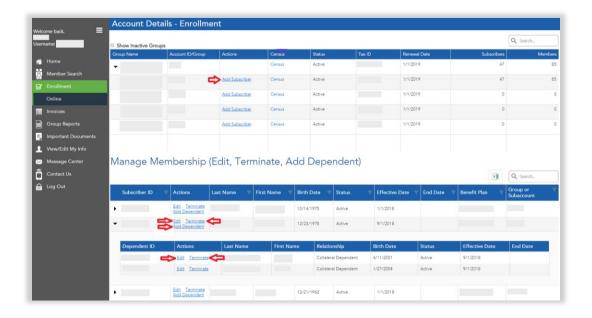

Enrollment Form Tab: Complete the Enrollment Form using the instructions and examples provided.

- The Census spreadsheet allows one transaction (one row) per member. If you need to terminate coverage for a member and then add COBRA coverage, we recommend the following steps:
 - o Perform the Termination in the Portal, then
 - Add that member back in on the Census with COBRA coverage.
 - Helpful tip: You can export the Census before termination, then change the member to COBRA in the Census spreadsheet. Click to save, then upload for processing.
- Do not overlook the **Action** and **COBRA** column entries.
- Any enrollment transactions that require documentation to be uploaded will need to be completed directly in the Portal. Examples: Adoption or Loss of Other Coverage.
- Make sure the file is saved in its original .xlsx format.
- 4. Follow the steps listed in the Portal to complete the **Census Upload**.
