What is my prescription drug coverage?

As part of your Baylor Scott & White Health Plan (BSWHP) coverage, you may have a prescription drug benefit. This document will help you understand your prescription drug benefit and the BSWHP formulary.

Not every prescription drug benefit is the same. The best way to determine your prescription drug coverage is to review your *Plan Benefit Documents* or call the BSWHP Customer Service department.

What is the Baylor Scott & White Health Plan Group Value Formulary?

A formulary is a list of selected medications covered by your plan as part of your health benefit in consultation with a team of health care providers. The formulary represents the prescription drugs believed to be a necessary part of a quality treatment program. BSWHP will generally cover the drugs listed on the formulary as long as the drug is medically necessary and plan rules are followed. The list contains both brand-name and generic medications and is updated regularly.

The BSWHP Group Value formulary lists drugs that are covered under your prescription benefit. Drugs not listed on the formulary are not covered. Non-formulary drugs require an exception request to be submitted for coverage consideration. Formularies continually change to reflect the most recent advances in drug therapy; therefore, this list is not all-inclusive and does not guarantee coverage. The formulary may change because we review new medical information regarding drugs as well as new drugs recently approved by the FDA.

How was the formulary created and how are new medications reviewed?

The Pharmacy and Therapeutics (P&T) Committee meets regularly to review new drugs approved by the FDA and new information regarding existing drugs. The Committee is primarily made up of physicians, pharmacists, and nurses. They review information and scientific evidence concerning safety, effectiveness, and current use in therapy.

Does the formulary ever change?

Since the P&T Committee meets regularly and reviews new information, the formulary may change. Below are some possible reasons the formulary could change:

- Generic forms of the brand drug become available. The brand-name medication may no longer be covered when a generic is available. The generic medication may be covered at the lower copayment.
- New drugs may be added by the P&T Committee.
- A drug may be withdrawn from the market by the FDA.
- A drug becomes available without a prescription (becomes available over-the-counter), then the drug may be removed from the formulary. Often, drugs available over-the-counter are not covered under the prescription benefit.

How am I notified of changes to the formulary?

You can find the formularies on our website at BSWHealthplan.com, which are updated quarterly. To view changes to the formularies, refer to the Monthly Group Value Formulary Changes document posted on the website. If you have questions or wish to obtain a printed copy of the formularies or pharmaceutical management procedures, please contact our BSWHP Pharmacy Help Desk 1.800.728.7947.

What are brand-name and generic drugs?

BSWHP covers both brand-name and generic drugs. A brand-name medication has a trade name and is protected by a patent, which can be produced and sold only by the company holding the patent. A generic drug is a medication approved by the FDA and created to be the same as the brand-name drug in dosage form, safety, strength, route of administration, quality, and performance characteristics. Generally, generic drugs cost less than brand-name drugs but the quality and effectiveness are the same. Generic drugs may differ from the brand-name drug in color, shape, flavor, or inactive ingredients. Some brand-name drugs have a generic equivalent and others do not.

What is generic substitution?

Generic substitution occurs when a pharmacist dispenses an FDA approved generic drug in place of a brand-name drug. Generic substitution will automatically occur at pharmacies in the BSWHP network. Prescribers may choose to use a brand-name product and not allow generic substitution. Per state law, the prescriber must note “brand necessary” or “brand medically necessary” on the prescription. This does not guarantee coverage. The brand-name product may not be a covered drug on the formulary, and thus not covered by your prescription benefit. Please refer to the Member Choice Program section for additional information.

What are specialty drugs?

Specialty drugs are those drugs used to treat complex or chronic conditions and which usually require close monitoring. Examples include but are not limited to drugs used to treat multiple sclerosis, hepatitis, rheumatoid arthritis, and cancer. Specialty drugs may be self-administered in the home by injection (under the skin or into a muscle), by inhalation, by mouth, or on the skin. These drugs may also require special handling, special manufacturing processes, and have limited prescribing or limited pharmacy availability.

What are pharmaceutical management procedures?

Pharmaceutical management procedures are processes that help ensure safe and appropriate use of drugs and ensure access to cost-effective therapy options. As part of such processes, restrictions (described in the following section) may be applied to certain drugs.

Are there any restrictions on my coverage?

Some covered drugs may have restrictions or limitations to coverage. These may include but are not limited to prior authorization or step therapy requirements, quantity limits, or safe use requirements (e.g., drug used at medically appropriate dose, not used with other drugs of the same type). Refer to the legend for a listing of restrictions. All restrictions are effective

as of the beginning of the plan year unless noted otherwise on the Monthly Group Value Formulary Changes document.

How do I request an exception to the BSWHP formulary?

You, an authorized representative, or a prescriber can submit a request for an exception to the formulary. For example, if there are clinically significant reasons why you cannot take a drug in accordance with the coverage requirements (e.g., step therapy, quantity limits), an exception request can be submitted for review. A non-formulary drug may qualify for coverage if you 1) have tried the formulary alternatives, or there are clinically significant reasons why the alternatives would not be appropriate for your specific condition, and 2) the requested drug is medically necessary, and 3) the drug is not excluded from coverage.

To request an exception, you, an authorized representative, or a prescriber can submit a coverage request electronically, by fax, mail, or phone. You and your prescriber will be notified of the determination in writing. If approved, the drug will be covered at the applicable copayment. If the request is denied, you may still purchase the medication at full cost. For questions regarding this process, visit BSWHealthplan.com or contact BSWHP pharmacy customer service at 1.800.728.7947.

What drugs are not covered by my prescription drug benefit?

Please refer to your *Plan Benefit Documents* for more information regarding plan coverage, limitations, and exclusions specific to your prescription drug benefit.

Often, over-the-counter medications and herbal products are not covered under benefit plans.

Are medications administered by my doctor covered under the prescription drug benefit?

Most medications that are administered by healthcare professionals are not covered under the prescription drug benefit, but may be covered under your medical benefit.

How much medication does my copayment cover and does my plan cover maintenance medications?

You can get up to a 30-day supply of medication for a single copayment. Note that medications with a quantity limit restrict the amount of drug you can get per prescription, per copayment, or over a certain time period. For example, categories that include drugs used for a short amount of time, such as antibiotics, antivirals, and most topical medications are available in 30-day supplies.

Maintenance drugs are medications prescribed for chronic, long-term conditions and are taken on a regular, recurring basis. To obtain this benefit, the prescriber must write the prescription for 3-months and the medication must be a covered maintenance drug. Your prescription benefit plan may not allow certain products or categories such as opioids, testosterone, sleep agents, benzodiazepines, specialty drugs, and drugs with quantity limits to be filled as maintenance.

How can I save money on prescriptions?

Review your *Plan Benefit Documents* for prescription copays and deductible information. Generic medications will usually be the lowest copayment option; ask your provider or pharmacist whether your prescription can be filled with a generic medication.

Take this formulary with you when you visit your provider. Selecting drugs that are listed on your formulary and at lower tier options can help save money.

Contraceptive Coverage

As specified by health care reform, women must have access to a full range of FDA-approved contraceptive methods and plans must cover

without cost sharing at least one form of contraception in each of the FDA identified methods.

- Please refer to the preventive drug notation (PV) on the formulary to determine which contraceptives are available at a \$0 cost-share.
- Certain over-the-counter (OTC) contraceptives for women may also be covered at a \$0 cost-share. These must be filled at a network pharmacy with a prescription prescribed by a health care professional.

Coverage may vary according to your plan. Please refer to applicable plan benefit documents.

Preventive Care Medications & Medications Covered Under Health Care Reform

Preventive care medications as well as other medications covered under Health Care Reform are covered according to your plan benefits. These medications are noted as preventive drugs (PV). Please note this list is subject to change.

To obtain this benefit, you must fill at a network pharmacy with a prescription prescribed by a health care professional (includes prescription and over-the-counter medications).

Smoking Cessation Medication Coverage

All FDA approved tobacco cessation medications, including prescription and over-the-counter medications, are allowed at \$0 cost-share per the Patient Protection and Affordable Care Act (PPACA). You are limited to 2 smoking cessation attempts per year, up to 180 days total. These medications are noted as preventive drugs (PV). Please note some drugs may be subject to step therapy or prior authorization.

To obtain this benefit, you must fill at a network pharmacy with a prescription prescribed by a health care professional (includes prescription and over-the-counter medications).

Diabetic Supplies

The preferred diabetic testing supplies include Accu-Chek® (Roche Diagnostics) Guide and Guide Me products and OneTouch® (LifeScan) products.

Sexual Dysfunction Drugs

All drugs for sexual dysfunction are excluded from coverage unless listed on the formulary. Quantity limits may apply.

Oral Oncology Split Fill Program

Prescriptions for drugs included in the oral oncology program will be restricted to a 2-week supply with each prescription fill for the first 2 months of therapy.

Naloxone \$0 Copay Program

Be prepared to respond to an overdose emergency. Naloxone can be used to protect you or your loved ones from accidental overdose and is available at \$0 cost-share. If you or someone you know is taking opioids, talk with your pharmacist or doctor about getting naloxone. In Texas, you can get naloxone from a pharmacy without a prescription. Naloxone is available as an injection or as naloxone nasal spray (Narcan®), and both are covered at a \$0 copay.

Member Choice Program

Brand-name prescription drugs with a generic equivalent may not be covered by your plan benefit. If you or your provider request a brand-name drug when a generic equivalent is available, then you are responsible for the non-preferred co-payment plus the difference in cost of the brand-name drug and the generic equivalent drug.

Please note the difference in cost does not apply to any Combined Deductible, Medical Deductible, Pharmacy Deductible, or the Maximum Out-of-Pocket for the Plan.

Reading your formulary

The formulary gives you choices so you and your doctor can determine your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, TOPAMAX) and generic medications in lowercase (for example, topiramate).

Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Your plan may have multiple or no tiers. Please note: If you have a high deductible plan, the tier cost levels will apply once you meet your deductible.

Drug Tier	Includes	Helpful Tips
Tier 0	Preventive	Tier 0 drugs may be available at a \$0 cost share based on Health Care Reform regulations. Please refer to the Notes column in this drug list for more information.
Tier 1	Preferred Generics	Use Tier 1 drugs instead of brand-name drugs, to help reduce your out-of-pocket costs.
Tier 2	Preferred Brand	Tier 2 drugs will generally have lower co-payments than non-preferred brand-name drugs.
Tier 3	Non-preferred Brands and Generics	Many Tier 3 drugs have lower-cost options in Tier 1 or 2. Ask your doctor if they could work for you.
Tier SP1	Specialty Preferred Generics	Specialty drugs are sometimes used to treat complex and chronic conditions and may require special monitoring and handling. Use preferred options in SP1 and SP2 when available.
Tier SP2	Specialty Preferred Brands	
Tier SP3	Specialty Non-preferred Brands	

Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

AL **Age limits** – Medications may only be covered if you meet the minimum or maximum age limit.

PA **Prior Authorization** – Your doctor is required to provide additional information to determine coverage.

PV **Preventive drugs** – Zero cost share preventive medications covered under Health Care Reform according to your plan benefits. Please note: this list is subject to change.

SF **Split Fill** – Oral Oncology medications restricted to a two week supply for the first two months of therapy.

QL **Quantity Limit** – Medication may be limited to a certain quantity.

ST **Step Therapy** – Trial of lower-cost medication(s) is required before a higher-cost medication can be covered.
