

2021 Access Plan

GN_AccessPlan-2021-

Requirements

TAC §11.1607(h):

An HMO is required to provide an adequate network for its entire service area. All covered services must be accessible and available so that travel distances from any point in its service area to a point of service are no greater than:

(1) 30 miles for primary care and general hospital care; and

(2) 75 miles for specialty care, specialty hospitals, and single healthcare service plan physicians or providers.

TAC §11.1607(j):

If any covered health care service or a participating physician and provider is not available to an enrollee within the mileage radii specified in subsection (h)(1) and (2) of this section because physicians and providers are not located within such mileage radii, or if the HMO is unable to obtain contracts after good faith attempts, or physicians and providers meeting the minimum quality of care and credentialing requirements of the HMO are not located within the mileage radii, the HMO shall submit an access plan to the department for approval, at least 30 days before implementation in accordance with the filing requirements in §11.301 of this title (relating to Filing Requirements). The access plan shall include the following:

(1) the geographic area identified by county, city, ZIP code, mileage, or other identifying data in which services and/or physicians and providers are not available;

(2) for each geographic area identified as not having covered health care services and/or physicians or providers available, the reason or reasons that covered health care services and/or physicians and providers cannot be made available;

(3) a map, with key and scale, which identifies the areas in which such covered health care services and/or physicians and providers are not available;

(4) the HMO's plan for making covered health care services and/or physicians and providers available to enrollees in each geographic area identified;

(5) the names and addresses of the <u>participating</u> physicians and providers and a listing of the covered health care services to be provided through the HMO delivery network to meet the medical needs of the enrollees covered under the HMO's plan required under paragraph (4) of this subsection;

(6) the names and address of <u>other</u> physicians and providers and a listing of the specialties for any other health care services or physicians and providers to be made available in the geographic area in addition to those physicians and providers participating in the HMO delivery network listed under paragraph (5) of this subsection;

(7) **the procedures to be followed by the HMO** to assure that primary care physicians, general hospitals, specialists, special hospitals, psychiatric hospitals, diagnostic and therapeutic services, or single or limited health care service providers and all other mandated health care services are made available and accessible to enrollees in the geographic areas identified as being areas in which such covered health care services and/or physicians and providers are not available and accessible, and any plans of the HMO for attempting to develop an HMO delivery network through which covered health care services are available and accessible to enrollees in the future; and

(8) Any other information which is necessary to assess the HMO's plan. ACCESS PLAN

Per §11.1607(j) (7), the following is a description of the processes and procedures followed by SWHP to assure that services are made available and accessible to enrollees for all specialties and in all geographic areas which are identified in the remainder of the access plan.; it is entered in this section to avoid repetition in each section below:

Scott & White Health Plan (SWHP) has active policies and procedures in place that enable members to utilize authorized services as in-network, in all counties and for all specialties/services, where the network lacks a sufficient number of providers to meet the needs of enrollees. SWHP then negotiates a Letter of Agreement with the out-of-network provider to ensure the member receives in-network benefit coverage. Covered member is not balance billed and/or penalized by SWHP for any specialty/service that is identified in an area that does not have a sufficient number of providers or a required provider specialty for the covered member.

The information below describes the counties and specialties where Scott & White Care Health (SWHP) does not have an adequate provider network per the requirements set forth in TAC §11.1607. A plan to enable enrollees to obtain in-network benefits is provided in each section. SWHP has active policies and procedures in place that enable members to utilize authorized services as in-network in all counties and for all specialties and services where the network is inadequate. SWHP negotiates a Letter of Agreement with the out-of-network provider to ensure the member receives in-network benefit coverage. Covered member is not balance billed and/or penalized by SWHP for any specialty or service that is identified in an area that does not have a required provider specialty for the covered member. Covered member will not be penalized or denied care for other benefits due to network inadequacy.

In the event a Member is unable to get specialized services within the contracted network; our contracting team will immediately research and identify a Provider to administer the service. Once a Provider is identified, we will execute a Single Case Agreement with that Provider and begin the contracting process.

SWHP leadership continually evaluates the adequacy of the provider network through various means such as the Network Issues Committee that meets once per month, monitoring concerns and access issues from Members and other providers, and business expansion strategies. SWHP negotiates single-case agreements and letters of agreement to assist with gaps in coverage in areas where there is a lack of providers, especially in rural areas. SWHP includes the following hold-harmless language in its single case agreements and letters of agreement, to ensure that members will not be balance billed for services by out-of-network providers when the provider network is inadequate:

"Provider hereby agrees that in no event, including, but not limited to non-payment by SWHP, insolvency, or breach of this Agreement, shall Provider charge, collect a dHMOsit from, seek compensation, remuneration or reimbursement from, or have any recourse against Member or any person or persons acting on her behalf for Services provided pursuant to this Agreement."

| County (whole or part) | Provider type | Reason Network Providers Not Available | Access Plan | Additional Notes |
|---------------------------|------------------------------------|---|--|------------------|
| Andrews | Acute Care Hospitals | Are not available to contract; | If a contracted provider is not available within the TDI distance standards, the provider will be paid at the in-network benefit level as specified in the Texas Administrative | |
