

# 2022 Access Plan

OVERVIEW
<p>A preferred provider benefit plan must include a health care service delivery network that complies with Insurance Code §1301.005 and §1301.006 and the network adequacy requirements described in TAC § 3.3704, such that the distance from any point in its designated service area to a point of service is not greater than: 30 miles in non-rural areas and 60 miles in rural areas for primary care and general hospital care; and 75 miles for specialty care and specialty hospitals.</p>
<p>Requirements: TIC § 1301.005, TIC § 1301.006, TAC § 3.3704</p>
<p><i>The following description of BSWIC's processes and procedures for addressing network deficiencies applies to all specialties and counties; it is entered in this section to avoid repetition in each section below:</i></p>
<p>Baylor Scott &amp; White Insurance Company (BSWIC) has active policies and procedures in place that enable members to utilize authorized services as in-network, in all counties and for all specialties/services, where the network is inadequate or lacks freedom of choice. BSWIC then negotiates a Letter of Agreement with the out-of-network provider to ensure the member receives in-network benefit coverage. Covered member is not balance billed and/or penalized by BSWIC for any specialty/service that is identified in an area that does not have a required provider specialty for the covered member. Covered member will not be penalized or denied care for other benefits due to network inadequacy or lack of freedom of choice.</p>
<p><b><i>In accordance with 1301.005(b) and 28 TAC 3.3708 (b), when services are rendered to an insured by a non-preferred provider because no preferred provider is reasonably available, and the non-preferred provider does not agree to an LOA, BSWIC will:</i></b></p>
<p><b><i>in addition to any patient coinsurance, copayment, or deductible responsibility under the plan; credit any out-of-pocket amounts shown by the insured to have been actually paid to the non-preferred provider for charges for covered services that were above and beyond the allowed amount toward the insured's deductible and annual out-of-pocket maximum applicable to in-network services.</i></b></p>
<p>BSWIC leadership continually evaluates the adequacy of the provider network through various means such as the Network Issues Committee that meets once per month, monitoring concerns and access issues from Members and other providers, and business expansion strategies. BSWIC negotiates single-case agreements and letters of agreement to assist with gaps in coverage in areas where there is a lack of providers, especially in rural areas. BSWIC includes the following hold-harmless language in its single case agreements and letters of agreement, to ensure that members will not be balance billed for services by out-of-network providers when the provider network is inadequate:</p>
<p>“Provider hereby agrees that in no event, including, but not limited to non-payment by BSWIC, insolvency, or breach of this Agreement, shall Provider charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against Member or any person or persons acting on her behalf for Services provided pursuant to this Agreement.”</p>
<p>The procedures described above for evaluating network adequacy are followed to ensure that the required providers and specialties are reasonably available and accessible to BSWIC Members to provide the full range of benefits under their insurance policy.</p>
<p>In accordance with 28 TAC §3.3704, the EPBP provider list (provider directory and/or online directory) includes individual provider(s) listed many times at several different addresses; for availability and accessibility of care within the service area, an individual provider that the EPBP listed numerous times, can adequately serve the enrollee population when they have multiple practice addresses because many of BSWIC contracted group's employee physicians that rotate between practice facilities. For example, Provider A works at location 1 Monday thru Wednesday and then Provider 2 works at location 1 Thursday thru Sunday. For hospital based provider groups, BSWIC is contracted with groups that consist of 30 or more providers that rotate between 5 or more hospitals in order to ensure each hospital is covered 24 hours a day, 7 days a week.</p>
<p>The EPBP has repeated providers on our provider list that are practicing within a group/company that has multiple locations (i.e. large clusters of providers listed at the same addresses). The contracts for these sites are at the group level but some are individually contracted providers. Contracting duties are not delegated. There are times that BSWIC delegates credentialing if the group has at least 100 providers and the group does the credentialing of their own providers. A pre-delegation assessment is completed to ensure the group follows the same regulatory standards as BSWIC. All contracts are evergreen and auto renew.</p>
<p>In accordance with 28TAC §3.3705 (12) a current list of providers and complete descriptions of the provider networks, including names and locations of physicians and health care providers, and a disclosure of which providers will not accept new patients must be included, this can be found at: <a href="https://portal.swhp.org/#/search">https://portal.swhp.org/#/search</a></p>

Need to know if the pharmacy is part of the agreement or if we need to contract. Gloria E. 7/23/2020 Response from Bruce Dier: We do not contract with pharmacies. It is not an eligible provider type. However, regarding this particular situation, it depends on how the pharmacy bills whether it be paid as PAR. If they use the hospital name and tin, then claims might be paid according to the hospital contract. Could depend on how the patient's insurance is set up. Might not necessarily cover that type service other than in an approved pharmacy - one approved by that particular benefit plan. KimS.
